

Review Questions - Component Training Series | TCDB 10101

Module 101 –Session 01

TCDB-10101-RQ01

Q - Computer Data is dependent upon what 3 things?

A - 1. Computer Hardware, 2. Systems (OS), 3. Applications

TCDB-10101-RQ02

Q - What are the 5 Layers of Data in terms of increasing importance and replaceability?

A - 1. System Data, 2. Application Files, 3. User Settings, 4. Application Data, 5. User Created Files

TCDB-10101-RQ03

Q - What are 4 ways to measure the value of data?

A - 1. Time Investment, 2. Replaceability, 3. Intrinsic Value, 4. Mass Impact

TCDB-10101-RQ04

Q - True or False: User Created Files are the most important of all data.

A - True. Files created and managed by the user (personal/company data) are the most critical of all data. They are the most difficult to replace and have the most value to the user.
